

**Please disseminate to Faculty  
Limited Submission**

**Office of Vice President for Research**

The Simons Foundation's Mathematics and Physical Sciences division invites nominations for Simons Investigators in Mathematics, Physics, Astrophysics and Computer Science. Within the Physics program, the foundation also invites nominations for Theoretical Physics in Life Sciences Investigators. The Simons Investigators program aims to provide a stable base of support for outstanding theoretical midcareer scientists, enabling them to undertake long-term investigations of fundamental questions in their fields. The intent of the program is to support these scientists in their most productive years, when they are establishing new research directions, providing leadership in the field and effectively mentoring junior scientists.

This is a Limited Submission opportunity. Temple University may submit up to **two nominations in each** of the **Mathematics, Physics, Astrophysics and Theoretical Computer Science programs** (two in Mathematics, two in Physics, two in Astrophysics, two in Computer Science) and up to **one additional nomination in Theoretical Physics in Life Sciences** (three total in Physics — two for Theoretical Physics and one for Theoretical Physics in the Life Sciences) for **total of 9 nominations.**

Pre-proposals for internal review will be submitted through [Temple InfoReady](#) by **5p.m. Friday, 9/19/2022**

Funding opportunity guidelines, along with the information required for the Temple pre-proposal, are on the Temple InfoReady site. The funding organization deadline is November 3<sup>rd</sup> 2022.

Temple InfoReady Log-in and User Profile creation instructions are available [here](#).
